Time travel romanceVon Helen HancoxChasing Silver is set in 2008 and yet the heroine, Remy Capra, is actually from 2082. When trying to escape from a corrupt policewoman, Kirsten Henryk, she found herself travelling back through time and across America to land unexpectedly in the middle of a firefight between a bounty hunter, Nathan Pierce, and the man he's trying to catch. Remy's time travel appears to have been caused by some special silver coins which she took from Kirsten and very soon she and Nathan realise that Kirsten has followed her in order to get them back.Remy

and Nathan have an instant attraction but Nathan's had some problems in his past with trusting a woman which means he finds it difficult to fully understand Remy. Remy, too, is very wary of cops or former cops and has always had to work on her own without backup. When Remy and Nathan find they are facing problems both from Kirsten and also from gang lords in Nathan's time they have to work together, alongside Nathan's former cop partner Isaac, to try to find their way out of the mess. Part of the disappointment with this book was the relationship between Remy and Nathan which was rather one-dimensional (that dimension apparently being sex). The friendship between Nathan and Isaac was far more interesting because of the way it had weathered the disaster five years ago which caused Nathan to leave the LAPD. Kirsten never really worked as a scary woman and the gang lords were also too indistinct and rather cipher-like to feel fully threatening. There was a reasonable amount of action in this story including kidnapping, gunfights and the rest but for this reader at least it wasn't very exciting and I found myself skim reading it towards the end.
