Uh, names are not tha autors gameVon Drake MorganWhile the book itselfe is a nice read, i realy have to take a star away from the rating because the autor realy has problems to keep names static.As an example:There is a female officer named: Major Simms, now Major Simms goes with the MC from a supply station. Later on the autor makes Major

Simms to someone who escaped with the MC from Jale...And No, its not a one time thing such stuff happens. The autor dosnt keep track of names and mixes them over again, makes it sometimes hard to follow the story because you read a name in a totally wron context. Thats confusing and dosnt realy help the imersion.Aside from that, a nice and easy read. Not super new, but nice.1 von 1 Kunden fanden die folgende Rezension hilfreich. An incredible good SF storyVon Peter ZimmermannI loved reading this book. It starts relatively conventional.....Aliens invading Earth etc....But then you reach the turning point of the story. A super intelligent powerfull aincient alien AI is introduced. But this one is so much different from the common alien AI you know from some other SF stories. This one is full of childish mischief and it thinks of itself as probably beeing slightly crazy. From this moment on the story really takes off.1 von 1 Kunden fanden die folgende Rezension hilfreich. funny and entertaining scifiVon harry hirschDid not read such a funny and entertaining book in a long time. Maybe the cheap price is due to some spelling errors which I don't really care about. The story is a bit slow to really kick off but then it is just fantastic.

KurzbeschreibungWe were fighting on the wrong side, of a war we couldn't win. And that was the good news.The Ruhar hit us on Columbus Day. There we were, innocently drifting along the cosmos on our little blue marble, like the native Americans in 1492. Over the horizon come ships of a technologically advanced, aggressive culture, and BAM! There go the good old days, when humans only got killed by each other. So, Columbus Day. It fits.When the morning sky twinkled again, this time with Kristang starships jumping in to hammer the Ruhar, we thought we were saved. The UN Expeditionary Force hitched a ride on Kristang ships to fight the Ruhar, wherever our new allies thought we could be useful. So, I went from fighting with the US Army in Nigeria, to fighting in space. It was lies, all of it. We shouldn't even be fighting the Ruhar, they aren't our enemy, our allies are.I'd better start at the beginning....KurzbeschreibungWe were fighting on the wrong side, of a war we couldn't win.
