be read' pile; there's one prior to this story, Freefall, which I haven't read. But that didn't matter as the story was easy to pick up and the (presumed) central characters of Freefall were a fairly minor part of this story, part of the 'High Risk' series. I enjoy reading books with military settings and with strong female leads and Cait Cavanaugh, an FBI Special Agent, could be seen as that. The male lead is a former Navy SEAL sniper, Quinn McKade, a surprisingly laid-back-seeming character who has become a writer since his retirement from the special forces and whose knowledge of sniper skills and tactics helps Cait when it appears a sniper has struck several times in the town of Somerset. Cait and Quinn have some history - a one night stand many years ago - which makes their initial encounters awkward. However, as they investigate further killings they begin to understand one another more and might just salvage something from their past. This story was always interesting to read, particularly the information about combat and snipers. However, I felt that Cait wasn't entirely successful as a sleuth. She didn't seem to actually solve the crime to me, just seemed to spend her time visiting different crime scenes, sparring with Quinn and not getting on with her FBI partner. Quinn, too, as a civilian, seemed to have a remarkable amount of freedom to investigate along with Cait and seemed almost too good to be true. At least the book steered clear of the massively over patriotic gushing SEAL enthusiasm which one often comes across - yes, these are impressive chaps, but they are humans too. I did like some of the insight into some of the stresses that combatants faced back in real life. I did enjoy reading this book because of the setting and some of the background information but didn't find the actual plot particularly gripping. However, it was good enough to make me want to pick up the next book in the series (Shattered), so it's worth a read if this is your kind of genre.
