fun, a nice blend of paranormal, romance and mystery. Von bsmorgentau Cara Salinas, the young Alpha of small a pack of Texan Werewolves, is about to have a heap of strange werewolves, displaced from Minnesota, dumped upon her by the Sazi (Shapeshifter) Council. So far Cara has lived for her family and pack and her job as a small town Sheriff. But the larger world is about to intrude and a gang of ruthless kidnapping raptor shapeshifters seems to be roosting in her very own territory. The attractive Adam Mueller has been sent to Texas to scout out the lay of land for the Minnesotan werewolves, who are about to join Cara's pack. They meet just in time for him to help her with her investigation... My favourites from the first two novels Tony, Bobby and Lucas also get drawn into the plot. C.T. Adams Cathy Clamp have been at special pains to research background information for rural Texas - it has been well worth it, they are able to offer very authentic details. For readers new to the series however I'd recommend starting with Hunter's Moon and not this book - there are too many references to what happened in earlier novels for newcomers to easily understand. 2 von 2 Kunden fanden die folgende Rezension hilfreich. Fifth in series - the story moves to Texas Von Helen Hancox This fifth book in the Sazi series is rather variable. Parts were very good and parts rather dragged or didn't feel comfortable. Although the fifth in the Sazi series, about werewolves, and containing many of the characters of previous books, it isn't necessary to have read any Sazi stories before to understand most of the events in this one. There are some less common aspects to this series, for example the frequent discussion of scents that the werewolves detect, even in human form, which help them to know whether people are lying or afraid, but there's also much that is familiar in this sort of tale, including the Alpha Male character in this book, Adam Mueller. Adam's like lots of other policemen male characters and he loses some points in this story for not telling the heroine, Cara Salinas, what's going on half the time. Cara has become the Sheriff of Tedford County in Texas when the previous Sheriff had a stroke. However she's found it a little difficult to adjust and things aren't made any easier in that she is now the Alpha of her small pack. It can be very hard for her to reconcile her werewolf rules, to protect them from discovery, with her policewoman's need to help and to serve. When she is visited by Adam Mueller from Minneapolis and discovers that some of Adam's pack may have to move down to her territory it starts a lot of planning as to how this can be managed. There's also a side plot with a lot of giant birds apparently eating livestock and stealing young girls; this part of the plot moved in fits and starts and was always a bit weird. The good aspects of the story were some of the locations, the story being told from the point of view of the Latina policewoman as well as through Adam's eyes, and the interesting and varied range of characters. However it never felt like it really glued together as a proper story, the romantic element seemed rather more of an afterthought at times, and the different plot threads being linked seemed too ridiculously unlikely a coincidence. I finished the book not entirely sure why the girls had been kidnapped, what was going to happen to them in the future, and who the snake man really was (presumably he will appear in a subsequent book). This story is probably one for fans of the Sazi series and not one for a newcomer as, despite its good points, it wasn't completely satisfying.
