David Weber's story about the first human adopted by a treecat was great; nothing like what I expected when I bought the book, but I found his story quite charming and interesting. Unfortunately, Drake, another of my favorite authors, seems way below his usual standards. The story just sort of drags malong to it's dull anticlimax. Fortunately, Stirling's story more than makes up for, giving an interesting look at

the PRH government situation. Stirling also shows that he shares Weber's skill at making the bad guys seem human and make them, if not likable, at least understandable. Weber's article at the end about the universes history, technology, etc. was vry interesting as well. A worthy purchase over all.0 von 0 Kunden fanden die folgende Rezension hilfreich. Good book - but not part of the H.H. storyline!Von Ein KundeThis paperback contains three short stories, only one of which is written by David Weber. This book DOES NOT continue the current storyline with Honor Harrington, as in the other Honor books. Instead, the stories in this book are set in the Honor universe, but do not contain any details about Honor herself. I especially enjoyed the first story, by Weber, which detailed the story of the first partnership between Treecat and Human, as hinted at by Honor in a previous book. While more of a "light" read than his other stories, I found it completely enjoyable. You learn quite a bit more about Treecats, since the story is told partially from their point of view. The other two stories were good as well, and expanded our knowledge of the HH Universe, but I didn't think they were quite as exciting as some of Mr. Weber's work. However, the stories are enjoyable, and point out the fact that there is plenty of room for other tales besides those of Honor Harrington. The last section is quite a treat, at least if you are a person who loves detailed pseudo-histories of fictional universes. Mr. Weber has taken the time to share some of his detailed notes with us, in the form of historical accountings and explanations of everything from how the Kingdom of Manticore was founded (complete with working details of the Manticore Government), to technology and space travel. If you enjoyed his other technical discussions in previous books, you will want to get this book. Overall, I enjoyed the book, it helped ease the yearning for the next book in the Honor series, and helped expand my understanding and enjoyment of the series. A good book and a good read.0 von 0 Kunden fanden die folgende Rezension hilfreich. Pleasant side roads in the 5th millenniumVon Sailour@Prodigy.NetIf you've managed to read any of my other reviews, you know I staunchly support Honor, and the military necsseties. Now, we have 1 story by DF Weber, in which he introduces the treecats as more than Honor's quizzical, mischevous emotional guru. Learn a little something intruiging about the Harrington lineage too.. 1 story from David Drake, which starts out making me wonder if anything interesting could possibly occur, then it does. Better than the Slammers even. 1 story from SM Stirling, who may have abandoned the 5th millennium of his own creation, but writes quite well in Honor's. If SM Stirling wrote for the Peeps, and DF Weber wrote for the Manties, there'd be hell to pay on both sides, something akin to 2 of Niven Pournelle's Motie warriors duking it out. No survivors. They're that good. Not to spoil it for you, but if things evolve from Stirlings contribution, God help the Manties. Either that, or the Peeps may actually be salvageable after all. Read it. For the warm fuzzies of the first story, the triumph of the second, or the bitter hope of the third.
