UnbelievableVon Tressa BischofThis was a fairly good read but I found the plot a little complicated and maybe

somewhat unrealistic or unbelievable.

Kurzbeschreibung Alice was the baby of the powerful Melrose family. She was forever at war with her father Harry. And she became estranged from him after she refused to give up her lover, a man her father loathed. But after he dies, Alice has to reassess their stormy relationship. And when her quiet, retiring, sixty-year old mother looks set to remarry less than a year after their father's death, the rest of the family are in uproar. Who is this stranger who has stolen their mother's heart and quite possibly her wealth, her siblings demand to know? Alice, however, believes that there is more to her gentle mother's new love than meets the eye. And she realises that it's not her mother's future that needs to be examined - but her past. From the metro bustle of London to the vibrant lure of Chicago, Alice searches for a truth that has been hidden through the years. And yet if she finds it, can she, or indeed the entire Melrose family, deal with the consequences? 'My Mother's Wedding' is a moving story of family, love and secrets that will grip readers from the first page to the last. 'An incredible story that kept me hooked.' - Holly Kinsella, best-selling author of 'Uptown Girl'. Frankie McGowan is a journalist and former magazine editor. Her novels include 'A Kept Woman' and 'A Better Life.' Endeavour Press is the UK's leading independent publisher of digital books.
